

For each bog area there is a current habitat map and a land use map showing the basic uses

Derries Habitat Map (right) 2013

Key changes to note from 2009 map: Reduced bare peat, increased vegetation cover, dominant habitats are birch/wetland mosaic.

Derries Habitat Map (below) 2009

Derries Habitat Map (below right) Future

It is predicted that birch/wetland mosaic will develop further, dominating the site.
